POWERING MOBILE POINT OF CARE

Designed with clinicians in mind, the Motion® C5v delivers mobility and reliability at the point of care. The industry's first Mobile Clinical Assistant (MCA), the C5v was designed specifically for healthcare environments in partnership with Intel® Health and based on input from thousands of clinicians worldwide. Lightweight, rugged and fully-sealed to ensure compliance with infection control protocols, the C5v is built for fast-paced healthcare workflows.

RUGGED, POWERFUL AND HIGHLY MOBILE

From the hospital to home care, the C5v's rugged design can handle the toughest conditions. With Corning® Gorilla® Glass for superior display protection, Motion's View Anywhere® technology and an industry-leading display, users get the best tablet PC viewing experience available. And now, with up to the Intel® Core™ i7 vPro™ processor, the C5v offers uncompromising levels of power, security and manageability. Extended battery life, a hot swap battery feature, superior performance and advanced remote management capabilities ensure that both clinicians and IT personnel can feel confident that the C5v is ready and patient data secure – freeing up valuable time and resources to focus on patient care.

Easily disinfected, lightweight and rugged, the C5v is designed for healthcare environments.

REAL-TIME PATIENT INFORMATION

Imagine every bit of patient information that must be referenced on a given day. Now imagine that it's accessible on-demand in a portable, lightweight device that weighs only **3.3lbs¹**. With a highly ergonomic design, the Motion C5v keeps the most up-to-date patient information at your fingertips. Increase productivity, save time, improve documentation and reduce errors by accessing patient data at the bedside. Use the optional **barcode scanner** and **RFID reader** for medication administration and patient identification. Take a photo with the integrated **digital camera** and quickly add it into the Electronic Medical Record (EMR) or collaborate with a variety of caregivers using the **web camera**.

SAFE AND SECURE SHARING

Send your entire team secure, up-to-the-minute patient information without ever leaving your patient's side. The Motion C5v seamlessly runs EMR applications and it's equipped with built-in **Wi-Fi[®]**, **Bluetooth[®]** and optional **Gobi™ connectivity** to keep you connected to the information you need and to help you easily share it with other caregivers. Plus, it keeps sensitive information secure with the **biometric fingerprint reader** and optional **smart card**. Available with a variety of processor options and built to run Windows 7, the C5v can manage virtually any clinical application and is as easy to integrate and support as any other device on your network.
