

DLI 8400

ultra-mobile rugged tablet computer

Computing Without Boundaries

**On the road. In the field.
At the jobsite. In the office.**

You'll find the DLI 8400 Ultra-mobile Rugged Tablet everywhere business gets done. Powerful, flexible and housed in a "go anywhere, do anything" compact form factor, the DLI 8400 is capable of running the most demanding mobile applications. Mounted inside a vehicle or in the hands of your field workforce, the DLI 8400 represents the ultimate in mobile computing performance and technology.

Engineered to survive multiple 4' drops to concrete, IP54-rated to protect against water, dust and dirt, and meeting MIL STD 810F for vibration and shock, the DLI 8400 can withstand the harshest operating environments.

As lightweight as it is rugged, the DLI 8400 comes packed full of features including integrated GPS, 802.11a/b/g/n, Bluetooth, and cellular radios - all running concurrently. Add VoIP, barcode scanning, an SD card reader, biometrics, RFID, color camera, a magstripe reader, and you've got a **completely self-contained communications and computing platform**. The DLI 8400 provides mobile and field service personnel with the freedom required to drive increased performance and productivity, no matter where the job takes them.

Built around an industrial-class Intel Atom processor, 7" outdoor-readable touchscreen, and sporting a backlit QWERTY keyboard, the DLI 8400 is designed to function in the widest variety of mobile work environments. Secured in our revolutionary Vehicle Mounting Cradle, the DLI 8400 brings real-time vehicle diagnostics and operating information to fleet managers, dispatch operators, and repair technicians alike thanks to an integrated J1708/J1939 and multiple other I/O interfaces.

Other key features of the DLI 8400 include:

- Choice of OS including Vista, Embedded XP, XP Pro, and Linux
- Dual hot-swappable batteries delivering up to 9 hours of battery life
- Mobile payment capabilities thanks to integrated Contactless Payment and Magstripe reader
