## ***IN-CAR VIDEO IN ACTION:***

### **Charleston Police Department Boosts Officer & Public Safety**

#### **An Integrated System for Improved Safety**

The Charleston Police Department was looking for a solution to:

- Deploy its patrol cars more effectively in the field for community protection
- Arm its officers with the intelligence needed to take safe, appropriate actions
- Integrate with its existing vehicle-rugged notebooks for seamless deployment

#### **Result: We've Got Your Back**

Vehicle-rugged notebooks integrated with in-car video system is delivering a solution that:

- Gets siloed technology systems and information sources working together to improve vital communications and situational awareness
- Enhances decision-making in the field and in the command center
- Gives law officers the necessary tools to perform more safely and effectively

"We need to put technology into officers' hands that will not only do the task, but make their task easier, more accurate and most importantly, make them safer. Traditional systems are stand-alone and don't communicate with each other. We wanted to implement a technology solution that integrates all systems and information sources to enhance situational awareness and speed information sharing among the officers. The tools put more information at their finger tips, enhance tactical and strategic decision making, and ultimately reduces crime levels.."

Police Chief Gregory Mullen  
Charleston Police Department
