

Fujitsu STYLISTIC® Q550 – Competitive Usability Comparison

Q: How do other Tablets compare with the Fujitsu STYLISTIC Q550 Tablet?

- The STYLISTIC Q550 allows you and your business to make real work happen, everywhere you go.
 - Apple iPad is a media consumption device designed to display, not create content, and has significant limitations in commercial environments.
 - HP Slate 500 is limited in enterprise applications by its *lack of* security features, 3G or 802.11a support, HDMI port, and replaceable battery.
 - Motion CL900 weighs more than the Q550 (2.1 lbs. vs. approx. 1.6 lbs.) which impacts your mobility and comfort when carrying and lacks system security for data protection.

A: The STYLISTIC Q550 is the ultimate mobile companion for your business.
