V5 SYSTEMS
RAPID OUTDOOR SECURITY

V5 Portable Security Solutions

THE MOST ADVANCED OUTDOOR SECURITY SOLUTIONS, DEPLOYABLE IN UNDER 30 MINUTES

100% Self-powered

- Powered via a proprietary battery and power management system with the option to add bullet-resistant V5 Solar Panels, directly connect to AC power when available or a combination of both

Live 24/7 Video Streaming

- View information via the V5 MMS (Multi-Sensor Monitoring System) with a web-based user interface, Android app and iOS app

Wireless Communications

- Get the convenience of onboard Wi-Fi, cellular or radio frequency

Modular Platform For Customization

OnSight™+ Portable Surveillance Unit with Analytics
Rapidly deploy pre-configured, self-contained security units with advanced analytics to detect people and vehicles in a defined zone.

OnSight™ Portable Camera Adaptive Platform
Take your surveillance offering to any outdoor area with a self-powered power and communications source. Turn virtually any surveillance camera into a self-powered, compact powerhouse.

OnSound™ Portable Acoustic Gunshot Detection
Detect and localize the source of gunfire and provide real-time location information for each gunshot event with a sensor driven by artificial intelligence.

OnSight™ Portable PTZ Unit
Pan/tilt and zoom functions allow you to remotely control your viewing area. Great for wide area coverage and details when zooming in.

### OnSight™ Portable Surveillance Unit For Situational Awareness
Need a basic outdoor surveillance solution? OnSight gives you a 24/7 live video feed from anywhere you have a security concern.
OnSight™ Portable License Plate Reader
License plate detection, with built-in software to help identify and record license plates on still or moving vehicles with the ability to stream video.

System Overview

Option to add Solar Power and connected directly to AC power

OnSound with proprietary battery & power management systems

V5 Encrypted Communications via Cellular, Wi-Fi or RF

V5 Cloud

V5 Multi-Sensor Management System (V5 MMS)

V5 MMS Web-based User Interface, Andriod & iOS app

3rd Party VMS for streaming video only

Real-time Data with Edge Computing and onboard Storage

Customizable Operational Time

Option 1 — OnSight — 100% Charged — Operational up to 3 days without solar input

Option 2 — OnSight + OnPower — 100% Charged — Operational up to 7 days without solar input

Choose the operational time that's right for you. Fully charged units without any solar input will be operational for up to 3 days. This operational time can be extended with the addition of an OnPower Portable Auxiliary Battery Unit, extending the operational time to up to 7 days without any solar input. Runtime may vary based upon final configurations.

Multiple Power Source Options

OnSight with proprietary battery & management systems

Option 1 — Proprietary Bullet Resistant Solar Power

Option 2 — Directly Tap Into Fixed AC Power

Option 3 — Solar + AC Power

Get the flexibility of 3 power options. All solutions include a proprietary battery and power management system and can be powered via bullet-resistant V5 Solar Panels, AC power or a combination of both. When connected to AC power, the battery and power management system acts as backup power when fixed power goes down.

Configuration Options

Communication

Wi-Fi, Cellular (3G/4G/LTE) or third-party communications devices such as RF (Radio Frequency) and Satellite.

Storage

500GB or 1TB of local storage (1TB will provide up to 30 days of HD video) and 200GB of cloud storage (up to 30 days of SD video). If your security requires more, we provide additional cloud storage. The V5 Cloud offers a simple, but secure, scalable solution to store, access, remotely backup and share data.

Camera Lens Focal Length

Depending on your surveillance needs, we offer two different focal lens length options:

- 2.8-12 mm for a wider field of view with focus on near objects of interest
- 7-22 mm for a longer-distance field of view with focus on further away objects of interest

Service

The V5 Multi-Sensor Secured Operating Center (V5 MSOC) provides state-of-the-art monitoring options to ensure your satisfaction and pride of ownership over the long-term.

Remote Guarding

Get the protection of a virtual security guard to keep your premises and assets secured. Randomized digital security checks are implemented twice a day (can be upgraded to more) with a customizable customer response model.

Platform Health And Power Status Monitoring

Keep your security solutions up-to-date and operational with the ability to remotely check the health and power status of your units.

Network Security

Data and Communication.............Proprietary V5 encryption using 2K RSA keys (2048 bits) with overall encryption using AES 256 (256 bit keys). SSL encryption for UI access.

Physical..Physical locks, GPS tracking system for live location reporting, shock / motion sensor against any unautho-rized/unscheduled movement of the units.

Onvif®

- Includes 2 Year Warranty
- RSA-2048 Keys, AES-256 encryption
