Rugged Notebooks and Tablets

W130 Fully Rugged Notebook (12.1" LCD / Intel® Centrino 1.6GHz CPU / 6.2 lbs)

Ultra slim rugged notebook W130, embedded Intel® Centrino® Mobile Technology with WWAN. Powered by Intel® Dothan 1.6GHz processor with high performance and low power consumption. Integrated heat dissipation pipe provides fan-less design. Sunlight readable display combined with touch screen solution on 12.1" LCD meet outdoor application and user needs. Magnesium alloy case, shock-mounted removable hard drive, dust and waterproof enclosure can protect valuable asset from damage. Vibration, drop and shock resistant design enable mobility in various field work, utility and industrial worker.

M230 Fully Rugged Notebook (14.1"/15" LCD / Intel® Core™ Duo 1.66GHz CPU / 9.14 lbs)

M230 is the latest ultra slim model. Powered by Intel® Centrino® Mobile Technology and Core™ Duo processor you can have the best wireless access and performance in various applications. Equipped with 14.1" or 15" Sunlight Readable LCD screen, M230 may be applied without being affected by direct sunlight. At the same time, you can switch from built-in WLAN to an optional 3G communication solution to maintain accessibility to network. In tough environments security always matters, and M230 has a built-in TPM 1.2 chip and Smart Card reader to protect valuable data. The magnesium alloy case, shock-mounted hard drive, and spill-resistant keyboard and touch pad make the M230 Mil-Std 810F and IP54 compliant to withstand any mishap.

A790 Fully Rugged Notebook (12.1"/14.1" LCD / Intel® Core™ Duo 1.66GHz CPU / 12.6/13 lbs)

A790 is designed and built to survive the harshest environments. Reliable and efficient operation is provided by a high performance 12.1" or 14.1" TFT sunlight-readable LCD, a shock-mounted hard drive, and a wide range of ambient temperature features. This extremely rugged model not only meets MIL-STD-810F and IP54 but also satisfies critical EMI requirements. A790 possesses extreme versatility and expandability, offering multi-bays for maximum flexibility and customized applications. Complementing this rugged, multifunctional notebook is a security package that includes a TPM 1.2 chip, a fingerprint biometric device, and a smart card reader.

P470 Rugged Notebook (14.1" LCD / Intel Core2 Duo 2.13GHz CPU / 6.5 lbs)

P470 is powered by Intel® Centrino® Mobile Technology, Core™ 2 Duo processor and a dedicated graphics processor . It is equipped with 14.1" wide sunlight readable touch screen which offers readability to outdoor situations as well as indoors. WLAN can be instantly switched to a built-in 3G communication solution to maintain accessibility to networks. In the tough environments security always matters, P470 has a built-in TPM 1.2 module, finger print scanner and Smart Card reader to provide additional 3 layers of excellent protection for valuable data. The magnesium alloy case, shock-mounted hard drive, and spill-resistant keyboard allow P470 to be able to adapt to daily environments.

CA27 Fully Rugged Tablet (10.4" LCD / Intel® Centrino™ 1.6GHz CPU / 5.1 lbs)

CA27 is the latest powerful, rugged tablets. It features a fully sealed 10.4" Touch screen display or Windows XP™ Tablet digitizer display that has advanced writing recognition features as well as mobile wireless support. The powerful computing comes with Intel® Centrino™ 1.6GHz (Intel® Pentium Dothan LV) CPU and 256MB of DDR RAM. The unique X-Bay options that support different kinds of communication modules, a vehicle docking station, and a 4-port option (one each SIO, USB, IEEE1394, LAN) makes the CA27 adaptable to any application.

V100 Fully Rugged Convertible Tablet (10.4"/12.1" LCD / Intel® Core™ Duo 1.2GHz CPU / 4.9/5.4lbs)

V100 features a 10.4" or 12.1" LCD display that rotates by 180 degrees to transform this compact notebook into a Tablet PC. It is a lightweight design with a tough magnesium alloy case and a removable hard drive that is protected against damage during operation. The low power consumption of the V100's Ultra Low Voltage Intel® Core™ Duo processor allows a quiet, fan-less design. V100 was tested in compliance with MIL-STD 810F and is sealed to IP54 standards, shielding the computer from unexpected spills and sprays.
